

BARACK OBAMA AND AMERICA'S YOUTH

BARACK OBAMA WILL INVEST IN AMERICA'S YOUTH

Affordable Higher Education

Obama will create a new American Opportunity Tax Credit to make the first \$4,000 of college completely free for most students. In return, eligible students will be required to perform 100 hours of public service a year.

Health Care

Barack Obama is committed to signing health care reform legislation that ensures all Americans have high-quality, affordable health care choices by the end of his first term in office. Obama will ensure that young adults can stay on their parents insurance plans until age 25 to help reduce costs for young people entering the workforce.

Jobs

Obama supports doubling federal funding for basic research, expanding broadband access, and making the research and development tax credit permanent so that young people with and without college degrees can thrive in the job market. Obama will invest \$150 billion in renewable energy projects to create up to 5 million new jobs, and will create an energy-focused youth jobs program to give more young Americans a good job opportunity.

Iraq and Foreign Affairs

Obama opposed the war in Iraq from the beginning and has a plan to responsibly end the war. Obama will renew American diplomacy by reaching out to foreign leaders and will reestablish America's moral leadership by respecting civil liberties and fighting corruption at home. Obama will continue to lead the global fight against HIV/AIDS, double U.S. funding for foreign aid, and work to end the genocide in Sudan.

Engage America's Youth in Politics

Barack Obama believes we cannot improve our government without involving young Americans in the political process. He supports measures that would make it easier for young people to vote, such as Election-Day registration and no-excuse absentee balloting.

Global Warming

Obama has been a leader in the fight to reduce greenhouse gas emissions and minimize the effects of climate change on our planet. He strongly supports a market-based cap-and-trade approach that will reduce our greenhouse gas emissions 80 percent by 2050.
